## PROJECTS

CarDekho Clone — React.js, Redux Toolkit, REST API, Bootstrap

- Built a responsive car marketplace platform with dynamic routing, category-based browsing, and reusable UI components.

- Implemented global state management with Redux Toolkit for CRUD workflows and Context API for lightweight shared state.

- Integrated REST APIs for real-time car and brand listings with loading and error-state handling.

Student Management System — Laravel, Passport (OAuth2), MySQL

- Built a REST API for student and course management with one-to-many relational data modeling.

- Implemented role-based access control, paginated search, file uploads, and soft-delete/restore functionality.

Multi-User Login System — Core PHP, MySQL, Bootstrap 5

- Designed a role-based authentication system supporting Admin, HR, and User dashboards.

- Implemented session-based access control with dynamic, role-specific dashboard rendering.

Portfolio Website — React.js, Vite, Custom CSS **ILLS**

- Developed a personal developer portfolio with animated hero section, scroll-spy navigation, and fully responsive dark-themed design.

- Built a custom typewriter-effect hook and used the IntersectionObserver API for performant scroll tracking.
